

# SurgAI Forge

Brand Exploration

# How to use this deck

1

**Walk through three brand directions.**

Each is a complete concept, color, type, logo, feel, shown as a moodboard.

---

2

**React: what you love, what you don't.**

Fonts, color, imagery, the logo marks. Gut reactions are exactly what we need.

---

3

**Align on one direction.**

Your decision lets us build the full brand guidelines around it.

Nothing here is final, and you don't have to pick one of the three concepts as-is. You can mix and match elements across them.

# The brand in one slide

The brief shaped every decision in these concepts. If a concept feels wrong, the brief is where to push back first.

## PERSONALITY

Quietly confident. Credible, durable infrastructure, a research foundation, not a startup launch.

## TWO AUDIENCES, ONE BRAND

Surgeons & trainees, and computer-vision & AI researchers. The brand must speak credibly to both.

These six offerings must be legible and prominent across every brand surface.

01 Open models

02 Datasets & video

03 Annotations & benchmarks

04 Web platform

05 No-code inference

06 No-code training

# The balances we're solving

---

Credibility ↔ openness

Rigor for surgeons and funders; an inviting, open feel for contributors.

Surgery ↔ AI

Two visual worlds. The brand needs a neutral third place that belongs to both.

Warmth ↔ precision

Human and approachable, yet exact and trustworthy. The interesting brand lives in the tension.

Emerging ↔ established

New, but it must look like durable infrastructure, the ImageNet / PyTorch bar.

# What this brand is *not*

## Not a startup launch

No hype, aggressive gradients, or "revolutionary" language.

## Not obviously AI

No glowing neural nets, neural-network visualizations, or generic "AI" iconography.

## Not a generic clinic

Not a hospital, device company, or stock-photo medical brand.

## Not text-heavy

Minimal copy. Let the design carry the message.

Anything else you'd add to this list?

# Three directions

## Concept 01

### Cardinal

Stanford cardinal and the current flame.  
Warm, institutional, credible.

Warm

Source Serif 4 · Source Sans 3

TRUSTED · ESTABLISHED · WARM

## Concept 02

### Forge

Material and engineered. A dark  
workshop ground with one warm ember  
glow.

IBM Plex Mono · Archivo

BUILT · SOLID · BOLD

## Concept 03

### Instrument

Precise and diagrammatic. Cool steel  
with one warm accent; data leads.

Spectral · Hanken · Plex Mono

PRECISE · CLEAR · OPEN

# Cardinal

Built on Stanford cardinal and the current flame logo. Warm and institutional, the classic academic-medical feel refined: confident serif headlines, generous white space, and cardinal used with restraint.

TRUSTED • ESTABLISHED • WARM

# Cardinal

Stanford cardinal and the current flame. Warm, institutional, immediately credible.

TRUSTED  
ESTABLISHED  
WARM

COLOR

TYPE

Forge

Confident serif headlines over a clean, neutral sans.

Source Serif 4 · Source Sans 3

LOGO

**SurgAI Forge**

# Cardinal · Applications

## Business card

front & back

# Forge

Rooted in craft and engineering. A dark workshop ground with a single warm ember glow and monospace-led type, the way trusted developer tools feel. Tactile, technical, and quietly confident.

BUILT · SOLID · BOLD

# Forge

Dark, material, engineered.  
Heat in the dark, kept subtle  
so it never tips into fire.

ENGINEERED  
MADE  
CONFIDENT

COLOR

TYPE

Forge

Monospace display for an engineered  
feel; a clean grotesque for body.

IBM Plex Mono · Archivo

LOGO

SurgAI Forge

# Forge · Applications

## Business card

front & back

# Instrument

Precision and clarity. A cool steel base with one warm ember accent, the surgery-meets-AI tension made visible. Data leads: benchmarks and the leaderboard sit front and center, and elegant serif headlines keep it from ever feeling mechanical.

PRECISE · CLEAR · OPEN

# Instrument

Cool, precise, data-forward.  
One warm accent against  
steel, credible to surgeons  
and researchers alike.

## Business card

front & back

# Logo

These options are separate from the concept direction.  
Any mark can be paired with any concept.

# The flame, evolved

The current mark stays in contention. The real question is the color, alarm-red, or a calmer ember.

A0

## Current

The honest baseline. Strong silhouette; the red gradient is the open question.

A1

## Ember

One warm tone, no gradient. Calmer and more timeless.

A2

## Outline

A lighter touch, ink outline with an ember core.

A3

## Hearth

Flame on a base, ties to the "open foundation" idea.

# Geometric alternatives

01 · Aperture

A lens, surgical video & computer vision.

02 · Accumulation

Progress accumulates; a leaderboard.

03 · Converge

Surgery & CS merging into one.

04 · Spark

The forge spark, the lit ignition.

05 · Foundation

An open base others build on.

06 · Seam

Two halves joined at a weld.
